

In the Field of Sport

"BIG TEN" WILL HAVE OWN MEET

Middle West Will Compete With Penn Games at Drake's Relays.

By United Press.
DES MOINES, Ia. (By Mail).—The middle western Olympics will be held here next spring. The quarter-mile oval of the Drake University stadium will see a two-day series of track and relay games that is expected to demonstrate the superior prowess of Western athletes against the East.

Drake's relays will be in direct competition with the well known Penn games. "Big Ten" track coaches, disgruntled with the reception given them in the East, decided to throw all their strength to the Drake games, and it is highly probable that a single athlete from west of the Alleghenies will dig a clear in Philadelphia cinders.

Date of the Drake carnival was set the same as the Penn games—April 29. Now, say the coaches, one need but com-

pare the records in Sunday morning papers, April 30, to decide the superiority.

Universities of the Missouri Valley and southern conferences and non-conference schools, including Notre Dame, have promised to throw their entire strength to the Iowa meet, instead of splitting their squads between the meets as in the past.

Dissatisfaction with the Penn carnival was brought about by the refusal of the Penn authorities to pay any part of the visiting athletes' expenses, although the meet was a financial success. Poor care of visiting track men, and the action of the eastern schools in refusing to enter representatives in the national intercollegiate meet in Chicago in June were also advanced as grievances.

Scope of events in the Drake games has been enlarged from the original dozen relays to a complete track meet. Events added this year include 100-yard and 220 yard dashes, the 120-yard low hurdles, the 220 and 440-yard low hurdles, the javelin throw, and the hop-step-and-jump.

Watches will be the prizes for firsts, the same as the big eastern meet the Drake games are designed to supersede. Preliminary heats will be held on Friday.

according to present plans, and the finals and relay races will take place Saturday. Track and grounds inside the big concrete stadium, known as the best in the Middle West, will be placed in intensive preparation for the biggest meet. Track Coach K. L. Wilson, of Drake, has promised. Wilson's promises to the "Big Ten" officials in Chicago were instrumental in influencing them to throw all their strength to the meet here, and he is working hard to put the Eastern meet "in the shade."

ARGENTINA OIL FUTURE BRIGHT

American Capital Is Now Being Invested in Territory of Neuquen.

By Bryant Powers,
(United Press Staff Correspondent.)

BUENOS AIRES (By Mail to the United Press).—America at last has entered the oil game in Argentina and Bolivia, where English, German, Belgian and other foreign capital has already been put to work.

In Argentina, American capital commonly reported to be that of the Standard Oil Company, has been invested in the new field in the territory of Neuquen, where drilling is now going ahead with excellent prospects. In Bolivia, the Standard Oil group recently obtained control of a huge amount of acreage held by the Braden interests.

Argentina's oil future is so bright that it is commonly believed among oil men that this country will prove to be one of the world's greatest producing centers when it is adequately developed. Bolivia also is known to possess possibilities of very great production. The Bolivian territory, however, because of the distance from market and the difficulties in the way of development, generally has been considered by experts as a reserve for the future. For some years American geologists scouting for powerful companies have been making detailed studies of prospective oil fields in this part of South America. While it has been known that reports almost uniformly were hopeful, no development work was undertaken, largely, it is understood, because the American companies were not satisfied with the laws regulating petroleum development that were in force. So little was done, in fact, that "the Americans come, then the Americans go" became a proverb among those interested in the industry in Argentina.

Powerful British interests, as well as German capital under the direction of Hugo Stinnes and others, and money from other nations, entered to field in the face of legal objections. They have now acquired such large interests that Americans practically were forced in self defense to take definite action. The first American purchase in Argentina was the ground being developed by the "Compania Petrolero de Challeco" in Neuquen, this company being directed by Argentines. Three drilling rigs are now on the ground there. It is understood that drilling operations will be actively pushed.

American manufacturers of oil-well and refining supplies and allied products should begin to look toward Argentina as a large potential market, in the opinion of the many American petroleum experts now in the country.

While Argentina is already producing oil in at least two good fields, the industry has not yet passed out of the swaddling clothes stage. In addition to tools for drilling, it will be necessary to purchase thousands of tank cars eventually, pipe for the construction of pipelines, pipe for casing, tankage, vehicles for oil-field transport, tankships and barges, roadmaking machinery for facilitating transport in the fields, refinery supplies, construction material for refineries and reloading stations, and many other like products. Because United States is the home of the oil industry and has always led in the development of the entire industry, it may expect a large share of the business that will be the outcome of the development here. Since practically everything remains to be done in the industry in this country, American firms selling oil field products still may enter the market on practically even terms with those of other countries.

LAUNDRY—Laundry called for and delivered promptly. Neat work. Call Ella Fisher, 1724. F-104f

WANTED—All kinds floor work, paper hanging, painting, roof repairing, gutter cleaning, etc. Phone 1332-red. S-86f.

WANTED—R. G. Harper, 1205 Broadway, to call at the Missouri office and receive two free tickets to the Columbia Theater. M-104

WANTED—Papering to do; good work at 30 cents a roll. Telephone 1596. M-56f.

BONUS MAY BE PROVIDED SOON

Legion Head Believes Compensation Act Will Be in Effect by July.

By United Press.
INDIANAPOLIS, Ind. (By Mail).—National Commander MacNider of the American Legion has stated that he had assurances that the World's War Veterans bonus bill, now in Congress, would pass Congress and go into effect in July, 1922. His assurances, he said, came from Senator McCumber, N. D., and Republican Fordney, Mich., sponsors of the bill in the Senate and House respectively.

When and if the bill becomes law in its present shape, each ex-service man or woman will be entitled to the following options:

1. Adjusted service pay, at the rate of \$1 a day for home service and \$1.25 for foreign service. Maximum of \$500 for man without overseas service; \$625 for man with overseas service.

2. Adjusted service certificate (so-called insurance feature), a paid-up 20-year endowment policy. The face value of this policy will be 3,338 times the amount that would be received in cash. The face value of this policy would be payable to the veteran at the end of 20 years. Loan values are also provided for.

3. Vocational training aid of \$125 a day while taking a course in vocational training. The amount thus paid in no case would exceed 140 per cent of what would have been paid in cash.

4. Farm or home aid, 140 per cent of what would be paid under option No. 1, if the money is used to purchase, im-

prove or make payments on approved farm or city or suburban home.

5. Land Settlement.
(A) Provides for the establishment of reclamation projects for the development and improvement of vacant land purchased by the government. If possible, project will be located in each state, the state paying part of the purchase price of private lands bought for this purpose. Ex-service men to be employed on the project as far as possible.

(B) Provides for the sale of farm units on these projects when they are ready for settlement. Sale price is to include purchase price of land plus cost of improvement. Terms, part down, rest in 40 years at 5 per cent interest.

(C) Veterans may have their adjusted service pay applied as first payment on this land.

The Legion refers to the bill as the adjusted compensation measure, claiming that the terms "bonus bill," is unjust to the men who will profit by the investment.

LIFEBOATS TO HAVE RADIO

Coast Guards Will Be Able to Communicate With Land.

Through the use of radio apparatus demonstrated by the radio section of the Bureau of Standards of the Department of Commerce, the lifeboats of the Coast Guard will be able in the future to talk to land stations of the Coast Guard even when out at sea in heavy storms or fog.

During the recent annual meeting of Coast Guard officials at Atlantic City, one of the thirty-six foot motor-driven surf boats that are used for rescue work was sent five miles off shore and it was demonstrated that men in the boat could easily converse back and forth with the shore station over the radio telephone which had been installed in the boat for

the occasion by Bureau of Standards engineers. Not only could the men on shore hear the speaker over the telephone but they could also hear the boat's whistle and an airplane flying over the boat. From the Coast Guard boat house at Atlantic City, where the land radio-telephone station had been installed, the voice of the operator on the surf boat five miles out at sea was relayed over a regular wire telephone to the Coast Guard station a mile away, by simply holding the receiver of the radio telephone to the wire telephone transmitter.

The novel feature of this installation was the use of a special type of coil antenna instead of the ordinary elevated antenna. The type of antenna ordinarily used on a boat, consisting of elevated wires attached to masts, can not be used on a surf boat because of the severe weather conditions to which the boat is exposed, and also because all space above the deck must be kept clear for the throwing of lines. The antenna used was a loop antenna, consisting of a single wire run along the guard on the side of the boat connected at each end to the iron keel. The keel thus formed part of the antenna.

It is expected that the radio telephone installation on the lifeboats will save many hours of hardship for members of the Coast Guard and will aid in the saving of life as well. Constant communication between Coast Guard boat and station will eliminate much waste work and danger. This will also make it possible for the shore station to direct a surf boat which is searching for survivors.

RICH LANDS IN PHILIPPINES
U. S. Owns 100,000 Square Miles in Islands—Year Round Crops.

MANILA (By Mail to United Press).—Do the American people know that they own 100,000 square miles of public lands

in the Philippines, and that this land is most of it, tremendously rich in natural resources?

One of the first things Governor Wood proposes to do is to reorganize the bureau of lands and get the public domain surveyed and under title.

The democratic acting Governor-General, Chas. E. Yeater, speaking in Manila on the eve of his departure, endorsed this proposal and said "The Philippines can support a population equal to the present population of the United States."

Yeater said that the total land area of the islands is 120,000 square miles, about that of Japan proper; but the Philippines produce big crops the year round, 60 per cent (against 12 per cent in Japan) of the land is tillable, while the forest resources are immeasurably more valuable than those of Japan. He showed that one acre here is equivalent to more than three acres in a temperate climate.

BIRTH RATE DECREASING

Population Increases But Buenos Ayres Worries Over Babies.

BUENOS AIRES (By Mail to the United Press).—During the seven years since the outbreak of the war, notwithstanding almost complete cessation of immigration the population of Buenos Aires has increased by more than 300,000. In the last decade the growth was more than 630,000, a truly astonishing figure, as compared with the census of other capitals.

There has been, however, a somewhat disquieting decrease in the birth rate of the city. With a population of 1,692,600, the births were only about 34,000 per annum, whereas in 1914, when the population was much less, these numbered nearly 51,000.

In some cases this decrease is attributed to the high cost of living.

REDMANOL

The Perfect Mouthpiece

Men who know pipe satisfaction will tell you that they prefer REDMANOL to any other mouthpiece because it has just the right feel on the teeth.

REDMANOL is as transparent and beautiful as amber; but stronger. Modern science has made it tasteless and odorless.

Whether you are buying a cigarette holder, a cigar holder, or a "jimmy" pipe, ask your dealer to show you one with a REDMANOL bit.

All Shapes—All Prices

If your local dealer doesn't carry REDMANOL pipes and holders send us his name and address.

ONE BRAND-ONE QUALITY-ONE Size Package

All our skill, facilities, and lifelong knowledge of the finest tobaccos are concentrated on this one cigarette—CAMEL.

Into this ONE BRAND, we put the utmost quality. Nothing is too good for Camels. They are as good as it's possible to make a cigarette.

Camel QUALITY is always maintained at the same high, exclusive standard. You can always depend on the same mellow-mild refreshing smoothness—the taste and rich flavor of choicest tobaccos—and entire freedom from cigaretty aftertaste.

And remember this! Camels come in one size package only—20 cigarettes—just the right size to make the greatest saving in production and packing. This saving goes straight into Camel Quality. That's one reason why you can get Camel Quality at so moderate a price.

Here's another. We put no useless frills on the Camel package. No "extra wrappers!" Nothing just for show!

Such things do not improve the smoke any more than premiums or coupons. And their added cost must go onto the price or come out of the quality.

One thing—and one only—is responsible for Camels great and growing popularity—

That is CAMEL QUALITY.
